Consultant specialized in economic approach of environmental externalities

Location: Lyon

Job code: L2111012

ORGANIZATION

EVEA is a growing French environmental consultancy specialized in **environmental impact assessment and ecodesign**.

Our mission: “Contribute to sustainable development by the ecodesign of products and services and by the diffusion of our tools and know how”

Our **activities** are:

- Life Cycle Assessment
- Product innovation through ecodesign
- R&D programs
- Development and implementation of software solutions to industrialize ecodesign approach in our clients' organizations
- Training

Our offices are located in Lyon, Nantes and Troyes with a multidisciplinary team of 30 consultants. www.evea-conseil.com

POSITION OVERVIEW

Based in EVEA Lyon's office and reporting to the R&D Program Manager, the candidate will be involved in an applied research project for a non-profit organization. (for detailed information : <http://www.fondation-2019.fr>).

This project belongs to EVEA's development initiatives aiming at delivering new business models for sustainable and profitable innovation.

The consultant will thrive in EVEA's entrepreneurial culture, and work with a diverse array of subjects, in direct contact with the customer supporting this project.

RESPONSABILITIES

The consultant will be responsible for realizing a synthesis, comparison and critical review of existing methodologies to monetize environmental externalities. This work aims at identifying missing areas to investigate and contributing to develop tools for the private institutions.

Specific tasks may include:

- Analyzing and comparing the different methodologies to monetize environmental externalities
- Reviewing and completing the existing bibliography, ranking sources
- Mapping of worldwide key experts
- Analyzing case studies, conducting interviews
- Designing the specifications of the dedicated Electronic Document Management Software
- Contributing to writing a synthesis and analysis of existing state-of-art methodologies
- Contributing to developing and testing tools for transcribing into economic terms identified environmental impacts
- Identifying new areas to investigate

QUALIFICATIONS

- Master's degree in Engineering or Economics or Business Administration ideally with demonstrated knowledge and experience in the monetization of environmental externalities
- Demonstrated interest for environmental issues at large
- Ability to work autonomously, and enthusiastic team player
- Rigorous though creative mind
- Focus on quality and attention to detail
- Excellent presentation and communication skills
- Excellent English writing and communications (French would be an advantage)

APPLICATION

Beginning: as soon as possible

Duration: 6 months. Can be extended.

Applicants are invited to send a CV and a short cover letter, detailing their interest for the position and their relevant experiences.

Please mention earliest start date.

Applications (cover letter and CV) should be sent to v.tardieux@evea-conseil.com and cc. m.huet@evea-conseil.com with "re: L2111012" in the email subject line.
